

1. Back to back bolt
M8 bolts supplied
2. Pull handle - thread side
M8 bolt (1) is screwed into the leg of the pull handle
3. Pull handle - grub screw side
The handle is placed over the exposed bolt head
4. Grub screw
Use the grub screw to securely fix the handle to the bolt head

Note: Both pull handles are the same and can be used on either the thread side or the grub screw side. Bolts may need to be cut to size

Note: We strongly recommend requesting a sample before committing to any cutting or drilling
